

New bevel gearbox

ZIMM®

KSZ-H MODEL RANGE

Now available in 7 sizes

- » 7 sizes in the L and T variants

Now in 3 drive ratios

- » 1:1 » 2:1 » 3:1

Now up to 60% more torque

- » Torque up to 60% higher than the previous KSZ range for the same physical size

Now corrosion-resistant as standard

- » The two-component paint finish and smooth surface ensure a long working life and resistance to contamination of the gearbox

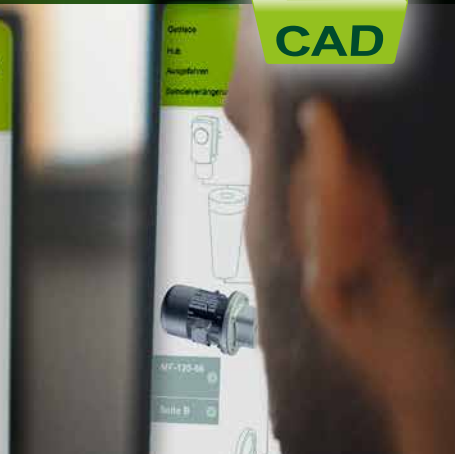

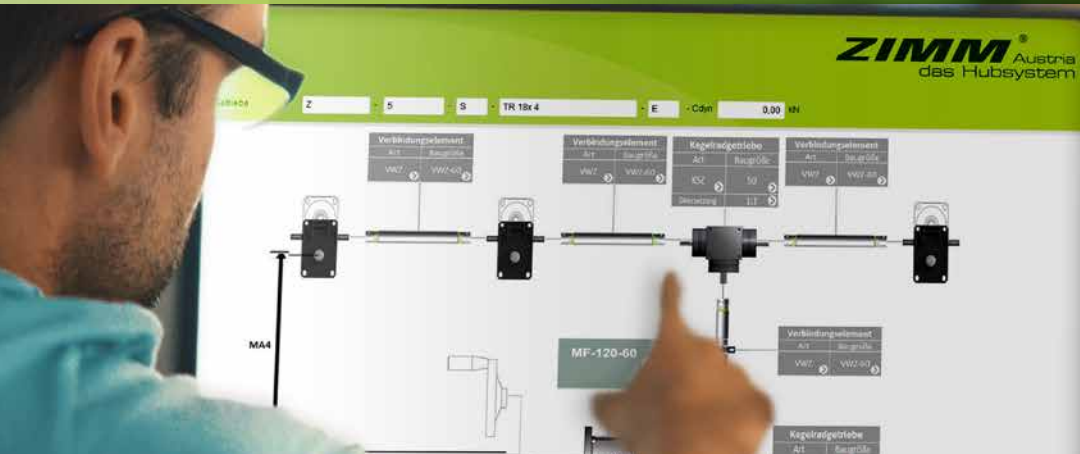

Now a modular design in the ZIMM Building Block System

- » Combine the bevel gearbox, screw jack system, couplings, connecting shafts, motors and motor flanges to suit the requirements of each of your applications.

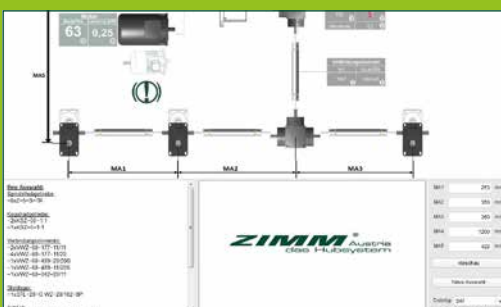

Unique product configurator

ZIMM[®]

SOFTWARE UPDATE !!!

TIME-SAVING AND CONVENIENT

Input the parameters

Select the components with a click of the mouse

Configure the screw jack

Amend the configuration at any time

- » Our LIVE tester automatically checks your personal choice of assembly and offers helpful comments

Preview the assembly at a click of the mouse

At the push of the 3D-PDF button, call up 3D data in a compatible format

NEW

Now you can build complete screw jack systems...

- » consisting of multiple screw jacks, coupling elements and bevel gearboxes
- » Design and check them online, save time, reduce uncertainty
- » Components are also prevented from clashing, since the system prevents conflicting components being selected altogether
